Mission Objectives

- Eliminate the human resistance leader.
- Collect the Furon data crystal.
- Secure the extraction point.

Step by Step Guide

1. Entering the Facility: Use the Furon transporter to appear in the abandoned research lab. Immediately engage the security drones using the plasma rifle.

Mission Objectives

Detailed Steps

1. City Entrance: Use the Furon's teleportation device to appear on the rooftop of the tallest building.

4. Securing the Underground Facility: Once the commander is defeated, the underground facility's entrance will open. Use the cloak to slip past remaining guards and secure the area.

Strategic Recommendations

- Use the city's infrastructure, such as elevators and traffic lights, to create distractions.
- Maintain a reserve of energy grenades for crowd control during the final confrontation.

- Always keep the cloak on standby for quick escapes.

Advanced Gameplay Techniques

As you progress, you'll encounter more complex missions that require advanced tactics. Below are some techniques that can help you master the game's challenges.

Utilizing the Cloak Effectively

The cloak is a game changing ability, especially in stealth missions. Here's how to use it to its full potential:

1. Activate the cloak just before entering a heavily guarded area.
2. Move slowly and use cover to avoid detection.
3. Deactivate the cloak only when you're ready to engage enemies.

Weapon Upgrades and Customization

Upgrading your weapons can dramatically increase your combat efficiency. To upgrade:

- Collect Furon tech shards throughout missions.
- Visit the upgrade station located in the underground facility.
- Select the weapon you wish to enhance and spend the required shards.

Managing Resources in Extended Missions

Long missions can deplete your ammunition and health. Keep these strategies in mind:

- Carry a multi use first aid pack.
- Use energy grenades sparingly to conserve ammo.
- Keep an eye on the HUD to monitor your resource levels.
