Begin with a brief discussion or a short video clip to activate prior knowledge. This primes students for the content they'll encounter on the worksheet.

2. Guided Practice

Walk through the first few questions together, modeling how to approach the tasks. Highlight key terms and concepts.

3. Independent Work

Allow students time to complete the worksheet on their own. Encourage them to refer back to notes or textbooks as needed.

4. Peer Review

Pair students to exchange completed worksheets. They can check each other's answers and discuss reasoning.

5. Class Discussion

Use the worksheet as a springboard for a larger conversation. Ask students to share interesting facts or surprising discoveries.
