Overview of the 4th Edition

Publication Context

Released in 2023, the fourth edition arrives at a pivotal moment: the rise of multipolarity, the resurgence of great power competition, and the rapid acceleration of digital diplomacy. The editors—Dr. Eleanor Hughes and Professor Miguel Santos—have updated the content to reflect these shifts, ensuring that readers encounter the latest data, policy briefs, and scholarly debates.

Authorial Collaboration

The book's authorship is a testament to interdisciplinary collaboration. Contributions come from political scientists, economists, sociologists, and cybersecurity experts, each bringing a unique lens. This mosaic of perspectives aligns with the book's core objective: to illustrate how international relations are shaped by an array of domestic, regional, and global forces.

Core Themes and Theoretical Foundations

Realism and Liberalism

Realism, with its focus on power and state security, remains a foundational pillar. The fourth edition revisits the classic balance of power paradigm while integrating contemporary concerns such as cyber warfare and climate security. Liberalism, on the other hand, is expanded to include transnational institutions, human rights norms, and the role of non state actors in fostering cooperation. By juxtaposing these perspectives, the textbook encourages critical thinking about the conditions under which states cooperate or conflict.

Constructivism and Critical Theory

Constructivist theory underscores the importance of ideas, identities, and norms. The authors weave case studies of the European Union's identity politics, the Arab Spring's normative shifts, and the role of social media in shaping collective identities. Critical theory adds a dimension of power analysis, exploring how hegemonic structures perpetuate inequality. Together, these frameworks help readers understand that international politics is not solely about material power but also about the cultural and ideological forces that bind or divide societies.
