Understanding the Kumon Method's Core Philosophy

The Kumon Method was developed by Dr. Toru Kumon in Japan in the 1950s. Its core philosophy is simple yet powerful: **learning by doing**. Students work through worksheets that gradually increase in difficulty, reinforcing concepts until they become second nature. This incremental approach builds a strong foundation, enabling children to master higher level skills with confidence.

Unlike traditional tutoring that focuses on problem solving, the Kumon Method emphasizes repetition and mastery. Each worksheet is designed to be completed independently, encouraging children to develop *study habits*, *time management*, and *self assessment* The answer book is the key tool that makes this process transparent and structured.
