What Is Still Flowing Yoga?

Still flowing yoga is a hybrid style that blends the steady, meditative qualities of *Hatha* and *Yin* yoga with the rhythmic, breath centric movements of*Vinyasa*. The practice is designed to cultivate:

- Body awareness through gentle, slow transitions.
- Deep breath control that supports a calm mind.
- Mindfulness and present moment focus.
- Improved flexibility and joint health without overstretching.
- A sense of inner peace that can be carried into daily life.

Unlike high intensity classes that demand quick, powerful movements, still flowing yoga encourages practitioners to move at their own pace, listening to the body's signals. The sequences flow smoothly from one pose to the next, creating a "still flow" that feels both grounded and dynamic.
