Understanding the Atlantic Slave Trade

Scope and Timeline

The Atlantic slave trade spanned roughly 150 years, beginning in the early 16th century and ending in the 19th. It involved three major phases:

1. The Early Phase (1500–1650): European traders established trading posts along West African coastlines, exchanging goods for enslaved people.
2. Peak Period (1650–1800): The triangular trade—raw goods from Europe to Africa, enslaved Africans to the Americas, and finished products back to Europe—reached its maximum intensity.
3. Decline and Abolition (1800–1865): Growing abolitionist movements and economic shifts led to the gradual outlawing of the trade.

Key Players and Routes

- European Nations: Portugal, Spain, Britain, France, the Netherlands, and others.
- African Kingdoms: The Kingdom of Dahomey, the Oyo Empire, and many others supplied captives.
- Routes: The "Middle Passage" carried enslaved Africans from West Africa to the Americas, while the "North Atlantic" routes linked Europe to the Caribbean.

Impact on Societies

In West Africa, the slave trade disrupted local economies and fueled conflicts. In the Americas, it created a labor system that underpinned plantation agriculture and industrial growth. Understanding these dynamics is crucial for grasping the long-term consequences that still echo today.
